

FTC Announces Increased 2022 HSR Thresholds

Written by Austin A.B. Ownbey

January 27, 2022

On January 24, 2022, the Federal Trade Commission (FTC) announced its annual adjustment of the jurisdictional thresholds for pre-merger notification filings under the Hart-Scott-Rodino Antitrust Improvements Act of 1976 (HSR Act). The revisions account for changes in the level of the U.S. gross national product. After decreasing the HSR thresholds last year, the FTC significantly increased the thresholds this year. The increased HSR thresholds were announced at the same time the FTC also announced increases in thresholds for interlocking directorates under Section 8 of the Clayton Act and less than two weeks after increasing the maximum civil monetary penalties for violations of 16 statutory provisions that the FTC enforces.

HSR Act Pre-Merger Notification Thresholds

The HSR Act requires companies contemplating mergers or acquisitions of voting securities, non-corporate interests, or assets that meet or exceed certain monetary thresholds to file notification forms with the FTC and U.S. Department of Justice (DOJ) and to wait a designated period of time before consummating the contemplated transaction. The new thresholds will go into effect for transactions closing on or after February 23, 2022, and represent more than a 9.7% increase from last year's thresholds. The key adjusted thresholds are summarized below:

Test	2021 Threshold	2022 Adjusted Threshold
Size of Transaction	\$92 million	\$101 million
Size of Party (smaller)	\$18.4 million	\$20.2 million
Size of Party (larger)	\$184 million	\$202 million
Size of Transaction (when Size of Party Threshold is Not Satisfied)	\$368 million	\$403.9 million

Although the HSR Act filing fees will not increase, these adjustments do affect the filing fee schedule as follows:

- \$45,000 for transactions valued at more than \$101 million, but less than \$202 million;
- \$125,000 for transactions valued at \$202 million or more, but less than \$1.0098 billion; and
- \$280,000 for transactions valued at \$1.0098 billion or more.

The regulations governing the methodology for calculating the size of party and size of transaction tests, as well as exemptions from the HSR Act, remain unchanged.

Interlocking Directorates

In addition, the FTC revised the Section 8 thresholds, which prohibit a person from serving as a director or officer of two competing corporations (known as an interlocking directorate or interlock). The prohibition is now triggered if each corporation has capital, surplus, and undivided profits aggregating more than \$41,034,000 (up from \$37,382,000 last year), and each corporation's competitive sales are at least \$4,103,400 (up from \$3,738,200 last year), unless an exception applies. The new thresholds became effective upon publication in the Federal Register on January 24, 2022.

Inflation-Adjusted Civil Penalty Amounts

Finally, on January 10, 2022, the FTC announced adjustments to various maximum civil penalty levels for certain laws it enforces, including failure to file an HSR notification. The action was required by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015, which significantly increased penalty levels in 2016 and required annual indexing of those levels for inflation.

Of most interest, the maximum civil monetary penalty for violations of the HSR Act and Section 5 of the FTC Act (concerning unfair methods of competition and unfair or deceptive acts or practices) increased from \$43,792 to \$46,517 per day. The new maximum civil penalties became effective immediately upon publication in the Federal Register. The new penalty levels apply to civil penalties assessed after they went into effect, including civil penalties imposed for violations that predated the increased penalty levels.

* * *

All of the revised thresholds will remain in effect until the next adjustment issued by the FTC, which generally occurs in the first quarter of each year.

It is important to keep in mind that a transaction will not escape antitrust scrutiny simply because the HSR Act's thresholds are not satisfied or because the HSR waiting period has expired. Indeed, the DOJ and FTC each regularly file suits seeking to unwind previously consummated mergers, including small transactions with purchase prices well below the thresholds, in situations where they believe the transactions are anticompetitive.
